### What is Alprazolam?

Alprazolam, commonly known by the brand name Xanax, is a benzodiazepine medication prescribed for:

- Anxiety disorders
- Panic attacks
- Generalized anxiety disorder (GAD)

Alprazolam works by enhancing the effects of GABA, a calming neurotransmitter in the brain, helping to reduce excessive nervous activity and symptoms of anxiety. It is a controlled substance due to its potential for dependence and must be used under medical supervision.
